## **Nissan's "No Charge to Charge" program arrives in Raleigh-Durham**

**RALEIGH, N.C. (Oct. 5, 2015)** – Nissan's "No Charge to Charge" promotion has officially arrived in Raleigh-Durham, providing new Nissan LEAF buyers two years of complimentary public charging with the purchase of the all-electric car from LEAF-certified dealers in the Raleigh-Durham area.

"Nissan LEAF is an attractive option for Raleigh-Durham car shoppers," said Andrew Speaker, director, Electric Vehicle (EV) Sales & Marketing, Nissan. "In addition to the \$7,500 federal tax credit, LEAF buyers can enjoy access to the HOV lane and now, two years of free public charging. Those benefits, combined with the significantly lower operating costs and zero spending on gas, make owning an all-electric vehicle a cost-effective and convenient choice."

Nissan now offers "No Charge to Charge" in 20 of the top markets for Nissan LEAF sales, including San Francisco, Los Angeles, Sacramento, San Diego, Fresno, Seattle, Portland (Oregon), Chicago, Atlanta, Indianapolis, Nashville, Phoenix, Dallas-Ft. Worth, Houston, Denver, Washington, D.C., Boston, Monterey and Austin. Nissan plans to expand the "No Charge to Charge" program to a total of 25 U.S. markets in the coming months.

With more than 188,000 global sales and more than 84,000 in the U.S., Nissan LEAF is the world's best-selling electric car. A 2015 Nissan LEAF starts at approximately \$19,010\*\* after the federal and state tax incentives, and it features seating for up to five passengers, lower running costs and an EPA-estimated\* range of up to 84 miles on a full charge. The 2016 LEAF, which goes on sale later this fall, boasts an EPA-rated range of 107 miles for SV and SL models. The public quick chargers can charge a LEAF from zero to 80 percent in less than 30 minutes.

All LEAF models feature an 80kW AC synchronous motor that generates 107 horsepower and 187 lb-ft of torque, providing a highly responsive, fun-to-drive experience that consumers often expect from traditional, gasoline-powered vehicles. Unlike internal

combustion engine-equipped vehicles, LEAF has no tailpipe, which means there is no emission of CO<sub>2</sub> or other greenhouse gases.

Consumers can find chargers eligible for "No Charge to Charge" via the LEAF EZ-Charge app for iOS or Android or at [www.ez-charge.com/stations](http://www.ez-charge.com/stations).

### **About Nissan North America**
